

Smartfinder Pro

Item No: 600000000029

The Smartfinder Pro is a new electronical director's viewfinder for lenses from S35 to full format and up to 65mm format. The Smartfinder Pro uses our UMS Universal Mount System, which includes ARRI LPL, PL and, on request, XPL.

The image is gathered on a 62mm groundglass, which is slightly larger than the image area of an ARRI Alexa 65. The groundglass concept is just like a traditional optical director's finder. Attach an iPhone behind the groundglass. The iPhone camera focuses through four IB(E) optical elements onto the groundglass and you view the image on the screen of your iPhone 7/8 Plus. The Smartfinder's handgrip fits a powerbank which allows you to charge the phone while scouting.

In addition, the iPhone lets you shoot framegrabs and, of course, videos. This is helpful for scouting and pre-viz.

Technical data

Alexa 65 Size Ground Glass

- High Resolution Ground Glass
- Diameter 62mm
- compatible with Super 35 up to ALEXA 65

LPL Mount

- 44mm FFD
- Diameter 62mm
- 3 ergonomic handles
- both side end - stops
- alternatively PL mount or LPL-PL adapter

Smartfinder Plus App

- new App built from scratch
- simulate camera sensors
- setup lenses and adapters
- add framelines
- built in DoF Calculator
- anamorphic de-squeeze
- capture, store and share photos and videos

iPhone 7 Plus

- 5,5" Retina HD Display
- 1920x1080 Pixel
- 1300:1 Contrast Ration
- 3D Multitouch

Advanced Imaging Optics

- 4 Lens design
- diffractive elements
