

PL-Extender Compatibility

PLx Extenders are compatible with almost all cameras whose sensor fits within the Extender's Minimum Image Circle projection.

For non-PL mount cameras, the appropriate Universal Mount System (UMS) mount will be necessary. The UMS allows quick and easy changing of camera mounts on an IB/E Optics lens adapter.

-PLx2 Extender

Minimum Image Circle Projection: 32mm
 Maximum Input Aperture: f1.8
 2x Extender

-PLx1.4 Extender

Minimum Image Circle Projection: 34mm
 Maximum Input Aperture: f2.8
 1.4x Extender (Mark I)

-PLx1.4 Mark II Extender

Minimum Image Circle Projection: 34.5mm
 Maximum Input Aperture: f1.6
 1.4x Extender

Below is the list of zoom and prime lenses that have been tested with PL extenders. It is updated as we conduct more lens tests.
